INVITATION

On behalf of the Organizing Committee, we welcome you to the XIII Latin American Workshop and Symposium on Anaerobic Digestion (DAAL XIII) to be held in Medellín, Colombia, from October 21st to 24th, 2018. This event is the thirteenth version of the series of Latin American symposium on anaerobic digestion that has historically taken place in different countries and which is supported by the International Water Association - IWA and its group of Anaerobic Digestion Specialists.

On this occasion, the event is organized by a large group of Colombian institutions: Universidad de Antioquia, Universidad Industrial de Santander, Universidad Nacional de Colombia, Universidad Javeriana, Universidad de Ibagué, Universidad del Valle, Universidad Pontificia Bolivariana, Universidad de la Guajira, Universidad de Cartagena and Colombian Biomass Energy Network.

Anaerobic digestion has been conceived worldwide as a sustainable and widely developed technology, which has allowed the treatment, recovery and recovery of waste and wastewater, including from the transformation of recalcitrant pollutants to the use of energy. In Colombia, anaerobic digestion has been fundamental to the development of the country as it has laid the foundations for basic sanitation in rural areas and has set the guidelines for the treatment of domestic and industrial wastewater and the proper management and disposal of sludge.

The city of Medellín has been an example of progress and equity in Colombia. In 2013, it was chosen as the most innovative city in the world in the City of the Year competition organized by The Wall Street Journal and Citigroup. Our city also won the Lee Kuan Yew World City Prize in 2016. Medellín is a leader in Colombia in the field of water management through the Aburrá Valley watershed sanitation program, which includes the infrastructure for collecting, transporting, and treating the wastewater from the ten municipalities that make up the Aburrá Valley, with the Aguas Claras Water Waste Treatment Plant being one of the most modern in Latin America and the largest secondary treatment plant in Colombia.

Welcome to the city of
everlasting spring
Medellín, 2018

In this context, the DAAL XIII will be a space for discussion on the alternatives of energy, environmental and social innovation in anaerobic digestion in Latin America. It will have the participation of international experts, achieving a broad vision on the treatment and recovery of waste and wastewater in a global environment.

Organizing Committee

MEDELLÍN

LOCATION

The geographic location of Medellin is strategic because it is located in a valley of the Central Andes Mountains, with an average temperature of 24° C (75° F); it is the second most important city in Colombia with 2,499,080 inhabitants and is the commercial, industrial, and technological development epicenter in the country. It has forty-one (41) institutions of higher education and is recognized for its leadership in finance, banking, services, politics, science, art, culture, communications, fashion and entertainment.

COORDINATES

6°14' 41" N 75°34' 29" O

WEATHER

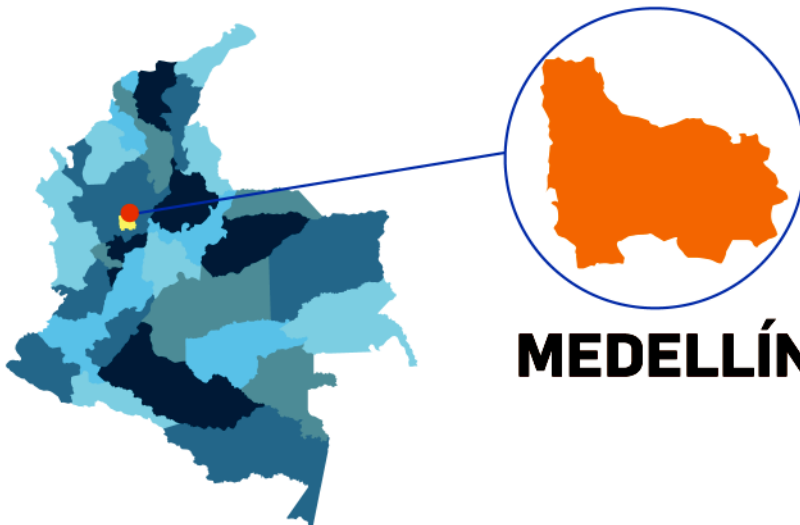

The climate is temperate and humid with an average temperature of 22°C.

ALTITUDE

1,500 m (4,900 ft) over sea level.

AREA

380.64 km² (146.97 sq me)

REASONS FOR BEING OUR PARTNER

To bring your company, institution or trade to a select group of participants.

To generate new contacts and share experiences with researchers, institutions, organizations, and entities of the sectors related to Anaerobic Digestion.

To interact in academic activities with high level and internationally recognized experts.

To know about advances, trends, developments, and innovations in the field of Anaerobic Digestion.

To offer projects, services, and products related to the application and development of Anaerobic Digestion.

To integrate in technical, social and cultural activities in one of the most innovative, modern and thriving cities in Colombia: Medellin.

CONGRESS TOPICS

Post-treatment of anaerobic effluents

Biodegradation of recalcitrant compounds

Microbial ecology and molecular biology

Automation and control of anaerobic digestion processes

Digestion of solid waste and energy recovery

Large-scale experiences

Use and exploitation of biosolids

PROCEDURE

The organizations interested in participating may choose the set of proposals submitted, those that are of interest to them.

Sample spaces are subject to availability.

DAYS FOR PAYMENT

April 30th, 2018. Deadline for payment with 10% discount.

June 30th, 2018. Deadline for payment with 5% discount.

August 30th, 2018. Deadline for full fare payment.

Availability: 1 place

5.800 EUR per place
