GUIDE FOR AUTHORS

1. The journal will accept original research papers, or reviews written in Spanish or English.

2. Manuscripts cannot exceed 25 pages and must be typewritten with a font size of 12 pt, double-spaced with 2.5 cm margins, and numbered consecutively. The manuscript should contain the following in this order: Title, Abstract and Keywords, Text, Acknowledgements (optional), References, Tables, and Figures. The Editors reserve the right to adjust style to certain standards of uniformity.

3. Title of the article must be provided both in Spanish and English.

4. An abstract (written in Spanish and English) must accompany each manuscript. Abstract should be concise, i.e. maximum length is 15 lines. Keywords in Spanish and English should be included as well.

5. Contact information for the corresponding author should include: Full name, email, affiliation, postal address, telephone and fax number.

6. Manuscripts should be written in Word (not older than 2000 version). They may be submitted by mail (in a properly identified CD) or by e-mail. All papers will be peer reviewed. Authors are asked to submit full contact details, including e-mail addresses, for five potential referees. Referees should be experts in the field of the paper, and not associated with the institution with which authors are affiliated.

7. Preparation of manuscripts:
   a) Text should be typed in Times New Roman, 12 pt. Special style or formatting should be avoided.
   b) Text must be justified. Single line spacing is to be used in the paragraphs. Words should not be hyphenated.
c) A single space should be used between words, and after a colon, semi-colon, period, or parenthesis.

d) Do not include page or section breaks.

e) The typesetter scripts must be long and touch the attached word: --, but the one that is used between words and numbers is the one of the keyboard, and without leaving spaces, example: physical-chemistry, 1999-2000.

f) Microsoft Equation Editor should be used in preparing the equations. Font Times New Roman, 12 pt is required.

g) Symbols used to represent constants, variables, or functions, either in latin or greek characters, should be typed in italics. Math symbols or numbers should not be typed in italics. A description of the symbol is to be included immediately after the equation.

h) Use italics to highlight words or phrases: avoid using bold face.

i) Figures should be numbered consecutively in the order to which they are referred, and given a descriptive caption. Photographs, charts and diagrams are all to be referred to as "Figure(s)." Figures that are not submitted electronically should be provided in camera-ready form.

j) Figure captions should be typed as normal text, i.e. should not be part of the figure.

k) Font Times New Roman, 12 pt, is to be used in any text within a figure.

l) Uppercase should be avoided in figure captions.

m) Tables should be prepared directly instead of pasting them into the manuscript. No vertical rules should be used. Tables should not duplicate results presented elsewhere in the manuscript, (e.g. in graphs).

n) For manuscripts written in english, period (.) is used to indicate decimal figures. Thousands and millions are indicated with colon (,).

o) SI units, dimensions, and symbols must be used.
p) Do not use color in graphs or figures.

q) Cited references are inserted in line with the text as sequential numbers within square brackets. One space is left between the bracket and the last word. Super- or subscripts are to be avoided.

8. A list of the literature cited is included at the end of the manuscript, after the acknowledgments section (if present). References should be based largely on peer-reviewed journal, book, or patent citations (i.e., the reference list should not rely significantly on information obtained from web sites) and should be presented in the formats shown below.

a) For journal papers:

b) For proceedings or book chapters:

c) For patents:

d) The URL and date of access should be provided for Internet references.

9. Foot notes are not recommended. If essential, foot notes should include only information that does not affect the continuity of the text (e.g., explanations or additional information).

10. Before using acronyms or abbreviation for the first time, spell out the complete name followed by the acronym or abbreviation in parenthesis. Use only the acronym or abbreviation in subsequent citations.

11. Submission of a paper implies that it has not been published previously, that it is not under consideration for publication elsewhere and that if accepted it will not be published elsewhere in the same form, in any other language, without the written consent of the publisher. All papers will be peer reviewed. The last decision on the acceptance of an article is made by the Editorial Board, based on the evaluation of the referees.

12. A hard copy of the issue where the collaboration is published will be sent to all authors

13. Please submit your manuscript to:

Revista Facultad de Ingeniería
Universidad de Antioquia
Ciudad Universitaria
Calle 67 No. 53-108. Bloque 18, oficina 141.
Medellín, Colombia.

Sudamérica.

Teléfono: (574) 210-5574.
